Technical Teamwork

Reflection 14

Total: 55

- What topic were studied this week, and what are their definitions? (5 Points)
  - o The main topic for this week is about synergism. The definition of synergy is: the interaction or cooperation of two or more organizations, substances, or other agents to produce a combined effect greater than the sum of their separate effects.
- Why is this week's topic important? (5 Points)
  - o With having synergy, it helps create better effects and end results. It can cause people to generate better ideas and solutions to certain problems. It can also help achieve the end goal or mission statement that an organization wants to get to.
- What phase of the projects did you complete? (5 Points)
  - o We are all finished with all of our projects and have made a one-page summary about all of them as well as created our PowerPoint Presentation and presented it to the class.
- What did I do to prepare for class this week? (5 Points)
  - o We did not have class in person this week. But we did read and watch videos about synergy. I read and watched the material needed about synergy.
- What is the most significant take-a-way from your study this week? (10 Points)
  - o I learned that when all members come together, that the result is better and more effective as all members of a team or organization works together, rather than working all independently. When working together, it can be more effective and have a better result in the end when having synergy. Synergy can be everywhere. At work in a team, in your family, etc.
- Why is this week's topic important for teamwork? (20 Points)
  - o When all members of a team come together, they make a bigger impact compared to just working separately. When all team members come and work together, it results in high productivity and efficiency, and helps the team reach a specific desired outcome or result.
