

Noah Lloyd

Technical Teamwork

Reflection 13

Total: 100

- What phase of the projects did you complete? (5 Points)
 - o My team and I completed all our projects. All that we had to do this week was give our acorn project presentation and complete the one page summary of our projects.
- Where did you put your assignments in GitHub? (5 Points)
 - o I posted all of my assignments, including the presentation and one page summary, to my GitHub pages, so that everyone and anyone will be able to see my work and assignments.
- What did I do to prepare for class this week? (5 Points)
 - o To prepare for class this week, I helped create the PowerPoint Presentation of our four Acorn Projects that we had worked on this semester. Also created the one-page summary of all four of the acorn projects.
- What did I learn from the study material? (5 Points)
 - o There was nothing to study this week. There was no preparation material for this week to study on.
- Why is this week's topic important? (5 Points)
 - o The main topic for this week was cooperation. Cooperation is important for relationships we have with others or groups of people. With cooperation, it can increase altruistic behavior which can be beneficial to everyone in that social group.
- What actions were assigned to you in your team meetings? (5 Points)
 - o In our meeting, we were making the PowerPoint presentation. We were each in charge of making the slides for each project. I was in charge of making the slides for the escape room project. That is the actions that I was in charge of.

- What topics were studied this week, and what are their definition? (5 Points)
 - The main topic for this week was about cooperation. The definition of cooperation is: the process of working together with a group or team to complete a task and get to the same end.

- Why is this week's topic important for teamwork? (20 Points)
 - Having cooperation in a team creates an atmosphere of mutual support with each other. It helps all the team members feel supported by each other. Cooperation helps keep motivation in the workplace. Cooperation helps all the members of the team to work together more effectively and accomplish the things that are wanting to be accomplished.

- How do you plan on contributing to the team, besides completing your tasks? (20 Points)
 - I plan on being more of a leader and example and help lead the group in the right direction, and to allow everyone a task in the group so that we are all working on something and contributing to the team. I want everyone in the team to be helping and doing something to contribute to the projects or whatever we may be working on.

- If this was a religion class, how would you relate this week's topic to the gospel? (20 Points)
 - Cooperation is very important. We need to cooperate and work with our fellow brothers and sisters. When we cooperate, we can get things down and hasten the Lord's work. We can help gather Israel and invite more to come unto Christ and receive his everlasting Gospel so that they will be able to live with him again.
